

WP Mercury User Guide

Dated: 27 March 2020

Configuring the Call/Contact Button

There are 5 menu items available; Fixed Button, Shortcode, Autoresponder, Contact Form Log, and Call log.

Fixed Button

Current Status: Allows you to make the button active or inactive.

Call Button Settings: Enter the phone number where you would like to be called when someone clicks the call button on your website.

Button Text: This is the text that displays on the button if the settings below are set to full width.

Fixed Button

Fixed buttons float on the page and are always visible to the users.

Current Status Active

Call Button Settings

Phone Number *

Enter your phone number with area code.

Button Text

Contact Form Settings

Form Text: This is the text that displays above the contact form entry fields.

Thank You Message: This is the custom message that displays after someone submits a contact form.

Email ID: This is the email address form field that displays on the popup contact form.

Form Fields: You can toggle on/or the following form fields – Phone Number, First Name, Last Name.

Contact Form Settings

User Email Display? Required?

User Phone Display? Required?

First Name Display? Required?

Last Name Display? Required?

Call Hours

Here is where you can specify the hours of operation. If someone clicks the call button during working hours, the phone will function. If someone clicks the call button during non working hours, the contact form will appear. You can add new work times using the + icon.

Call Hours

From	To	
<input type="text" value="12:00 AM"/>	<input type="text" value="11:00 PM"/>	

The call button will display during these hours, otherwise the contact form will display.

Other Settings

Color: You can set the background color of the call button.

Page Settings: You can specify which pages of your website you want the call button to display.

Display only on Mobile Devices: You can toggle this option to only display on a mobile phone.

Color

Page Settings

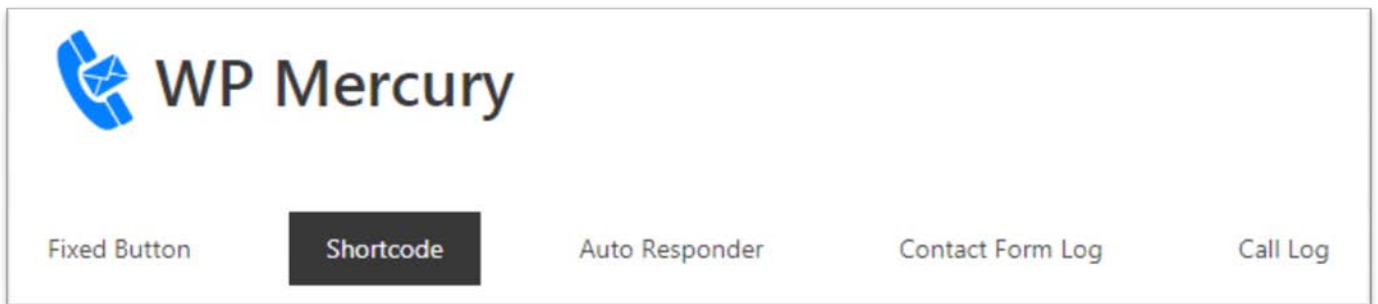

- Sitewide - All Pages
- Display only on certain posts / pages
- Custom Posts

Display only on Mobile devices?

Other Settings

Color: You can set the background color of the call button.

Page Settings: You can specify which pages of your website you want the call button to display.

Shortcode

This section allows you to create a shortcode to insert within your website pages, and customize the text and color of the call button. This shortcode can be used in addition to the fixed call button.

Shortcode

Copy the shortcode below and insert it anywhere in your content.

Call Button Settings

Text

Enter a button text.

Color

Hide the phone icon in your
button?

Hide the phone icon from your call button.

```
[wp_mercury btn_text="Call Me" btn_color="#007bff
```
